EXHIBIT INDEX

Exhibit 1.01 Wabtec Corporation 2019 Conflict Minerals Report

2019 Conflict Minerals Report

Introduction

Westinghouse Air Brake Technologies Corporation, doing business as Wabtec Corporation ("Wabtec" or the "Company"), prepared this Conflict Minerals Report ("Report") for the year ending December 31, 2019, as provided for in Rule 13p-1 of the Securities Exchange Act of 1934, as amended, and Form SD (collectively, the "Conflict Minerals Rule"). On February 29, 2019, Wabtec merged with GE Transportation becoming one of the world's largest providers of locomotives, value-added, technology-based equipment, systems, and services for the global freight rail and passenger transit industries, with over 27,500 employees and operations in over 50 countries. Wabtec provides its products and services through two principal business segments, the Freight Segment and the Transit Segment. The Freight Segment primarily manufactures and provides aftermarket parts and services for new locomotives; provides components for new and existing locomotives and freight cars; builds new commuter locomotives; supplies rail control and infrastructure products; and provides heat exchangers and cooling systems for rail and other industrial markets. The Transit Segment primarily manufactures and services components for new and existing passenger transit vehicles, typically regional trains, high speed trains, subway cars, light-rail vehicles and buses; supplies rail control and infrastructure products; and refurbishes passenger transit vehicles.

Wabtec manufactures a wide range of products that contain tin, tantalum, tungsten or gold ("3TG"), but Wabtec does not purchase ore or unrefined 3TG from mines and is many steps removed in the supply chain from the mining of these minerals. We purchase materials from a wide network of suppliers and rely on them to assist with our reasonable country of origin inquiry regarding the 3TG that are necessary to the functionality or production of products we manufacture. After performing our reasonable country of origin inquiry and due diligence for 2019, we are unable to definitively determine whether the 3TG contained in our products originated from the Democratic Republic of the Congo or an adjoining country (collectively, the "Covered Countries"). Therefore, we are submitting this Report describing the due diligence we have performed pursuant to the Conflict Minerals Rule and our related processes and procedures.

This Report includes:

- the design of our due diligence measures;
- the due diligence we performed for 2019, including the steps we took to mitigate the risk that 3TG in our products benefit armed groups;

- the smelters and refiners of 3TG identified as potentially within Wabtec’s supply chain and the countries of origin of ores that are potentially in the supply chains of these smelters and refiners; and
- the steps that we plan to take to ensure continued progress towards eliminating conflict minerals in our supply chain.

Due Diligence

1. Design of Wabtec’s due diligence measures

Wabtec has adopted Conflict Minerals Guidelines (the “Guidelines”) that lay out the design of our 3TG due diligence process. The Guidelines describe procedures that Wabtec Corporate and its business units use to perform due diligence on the source and origin of 3TG contained in products we manufacture. Wabtec designed its due diligence measures to be in conformity, in material respects, with the *OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas* including, the *Supplement on Tin, Tantalum, and Tungsten* and the *Supplement on Gold* (collectively, the “OECD Guidance”).

2. Description of Wabtec’s due diligence measures for 2019

Wabtec’s 2019 due diligence measures covered its two principal business segments, the Freight Segment and the Transit Segment. Wabtec designed its due diligence measures in conformity, in all material respects, with the Five-Step Framework for Risk-Based Due Diligence in the Mineral Supply Chain contained in the OECD Guidance.

Step 1: Establish strong company management systems

A. Adopt and commit to a supply chain policy for minerals originating from conflict-affected and high-risk areas

Wabtec’s Conflict Minerals Policy, which is available on Wabtec’s website, outlines our commitment to responsible supply chains and to the avoidance of conflict minerals that directly or indirectly finance or benefit armed groups in the Covered Countries. Moreover, the Guidelines contain the operative provisions of the Policy, as well as the process for ensuring that risks are adequately managed. Additional Wabtec policies relating to the due diligence measures contained in the OECD Guidance are incorporated into Wabtec’s Code of Conduct, which is available on Wabtec’s website (for more information, see “**Where You Can Find Additional Information**” below).

B. Structure internal management systems to support supply chain due diligence

Internal management system. Wabtec’s internal management system for its supply chain due diligence is coordinated by Wabtec Corporate, with support from the individual Wabtec business units.

- **Wabtec Corporate.** Wabtec’s Sourcing Compliance organization, with cross-functional support from Legal and Sourcing leaders, has oversight responsibility for Wabtec’s Conflict Minerals Policy, including the establishment of processes and procedures to carry out this policy. The Sourcing Compliance organization also leads Wabtec’s supply chain due diligence efforts and risk management review with support from the Wabtec business units.

- **Wabtec business units.** Each Wabtec business unit must provide all direct material suppliers whose parts may contain 3TG to Wabtec Corporate.

Internal reporting. For 2019, Wabtec used the following 3TG due diligence reporting mechanisms:

- **Reporting to Chief Procurement Officer (CPO).** The CPO reviewed Wabtec’s Conflict Minerals program and risk assessment with relevant stakeholders from Sourcing and Legal to determine the appropriate steps to mitigate any supply chain risks.
- **Coordination with Wabtec business units and Sourcing leaders.** Sourcing leaders at each Wabtec business unit conduct reviews of each business unit’s due diligence activities to improve supply chain transparency. Where there is reason to believe that a supplier is not honoring its contractual obligations under the Guidelines, Wabtec, depending on the circumstances, works with the supplier to address such concerns. In the event of continued concerns, the Wabtec business unit may take additional measures, up to and including termination of the supplier.

C. Establish a system of controls and transparency over the 3TG supply chain

Identifying suppliers. Each Wabtec business unit identified:

- **Relevant Suppliers** defined as suppliers that provide inputs to Wabtec products that are known or are likely to contain 3TG through a process that is based on an examination of internal records such as bills of material or other product specifications, a qualitative review of sourcing records, or information provided by the supplier; and
- **Significant Suppliers** defined as suppliers within the universe of Relevant Suppliers that are most significant to Wabtec’s 3TG program, using criteria such as the amount of sourcing spend with the supplier.

Identifying smelters and refiners in the supply chain. Wabtec Corporate used its best efforts to identify smelters and refiners of 3TG by surveying Significant Suppliers using the Responsible Minerals Initiative’s (“RMI”) Conflict Minerals Reporting Template (“CMRT”). The survey tools are designed to collect, manage and archive (for at least five years) supplier information relevant for 3TG due diligence including, among other things, the identity of smelters and refiners of 3TG in the supplier’s supply chain. We apply criteria based on the CMRT across Wabtec business units for assessing the acceptability of survey responses.

Conducting a reasonable country of origin inquiry. For upstream due diligence to identify countries of origin and other relevant information about the conflict status of metals produced by the smelters and refiners identified as potentially in Wabtec’s supply chain, Wabtec relies on the information made available through the Responsible Minerals Assurance Process (“RMAP”) administered by RMI. Wabtec relied on this information to identify (1) the status of smelters and refiners potentially in Wabtec’s supply chain; and (2) the countries of origin of ores that are potentially in the supply chains of these smelters and refiners. Where the data showed that ores utilized by one or more of these smelters or refiners originated in one or more of the Covered Countries, Wabtec concluded that there is reason to believe that 3TG from the Covered Countries may be present in the products of the business for which such smelters or refiners were reported as potentially in the supply chain. Due to business confidentiality and other competitive concerns, as recognized by the OECD Guidance, the RMI does not publish detailed information on the specific mine and location of origin of ores that supply the smelters and refiners subject to verification reviews. Consequently, no such information is provided in this Report. RMI’s efforts

to determine such information is described on the RMI website (see “**Where You Can Find Additional Information**” below).

D. Strengthen company engagement with suppliers

Regular communications. Wabtec communicates its expectations on responsible supply chains of 3TG by transmitting surveys and other communications from the sourcing organizations of the Wabtec business units to Significant Suppliers and other Relevant Suppliers. In addition, the Sourcing Compliance organization provides training to select suppliers on Wabtec’s 3TG program.

Contractual obligations. Each Wabtec business unit incorporates standard language regarding conflict minerals compliance into supplier contracts, which contractually obligates Relevant Suppliers to (1) use best efforts to procure 3TG from sources that have been verified as conflict free; (2) provide supporting data on their 3TG supply chains to Wabtec when requested; and (3) provide Wabtec with audit rights and the right to terminate the contract in the event of material non-compliance.

E. Establish a company-level grievance mechanism

Open reporting system. Each Wabtec business unit has an open reporting system to allow employees and third parties to report concerns about policy violations, including concerns related to our 3TG policies. Concerns can be reported anonymously or for attribution through several channels, including any compliance resource (e.g. Wabtec manager, Wabtec legal counsel or auditor), by calling the Wabtec Ethics & Compliance Hotline at (877) 860-1054, or by emailing reportline@tnwinc.com.

No retaliation. Retaliation against any person for reporting a compliance or integrity concern is forbidden.

Step 2: Identify and assess supply chain risks

A. Use best efforts to identify the smelters and refiners in the supply chain

During 2019, using the processes described in Step 1.C above, Wabtec identified 4,593 Relevant Suppliers, including 1,056 Significant Suppliers. Our Significant Suppliers identified 279 smelters and refiners of 3TG that were potentially in their supply chains. See [Table A](#) below for a list of these smelters and refiners and a summary of their validation status under the RMAP.

B. Identify the scope of the risk assessment of the 3TG supply chain

Engaging with suppliers. Wabtec’s 3TG supplier survey asks suppliers to identify smelters or refiners of 3TG in their supply chains. We seek to engage all Significant Suppliers to encourage the smelters and refiners in their supply chains to become validated as conformant by the RMAP or a similar program.

C. Assess whether the suppliers have carried out all elements of due diligence for responsible supply chains of 3TG from conflict-affected and high-risk areas

Wabtec conducts due diligence to determine the degree of its suppliers’ compliance with the contractual obligations laid out in the Guidelines. Measures may include reviewing supplier responses for completeness, accuracy, and credibility, as well as confirming smelter status by checking against the Smelter Look-up tab list of the RMI’s CMRT and the RMI’s Conformant Smelter list.

D. Where necessary, carry out joint spot checks at the mineral smelter or refiner’s own facilities (including through participation in industry-driven programs)

In accordance with OECD Guidance, including its audit recommendations for downstream companies, Wabtec implements upstream audits by participating in and cooperating with industry organizations. Wabtec is a member of RMI (member code: WABT) and relied on the RMAP to conduct a risk assessment at the upstream level. For each smelter identified in its supply chain, Wabtec assessed the information available from the RMAP to determine whether there were any “red flags” (as defined in OECD Guidance) and, if needed, develop a corrective action plan. We encourage removal of any high-risk smelters from our supply chain.

Step 3: Design and implement a strategy to respond to identified risks

A. Report findings to designated senior management

See Step 1.B above for a description of Wabtec’s 3TG due diligence internal reporting processes.

B. Devise and adopt a risk management plan

Wabtec annually compiles a report of 3TG risks identified in its supply chain for review by Wabtec’s Chief Procurement Officer to determine the appropriate steps to take in mitigating any identified supply chain risks. In 2019, Wabtec focused on reducing risk by (1) engaging Significant Suppliers to encourage the smelters and refiners in their supply chains to become validated as conformant by the RMAP, and (2) encouraging Significant Suppliers who identified high-risk smelters and refiners to remove them from their supply chains. A high-risk smelter or refiner is one for which there are credible reports that such smelter or refiner sources materials in a manner that directly or indirectly finances armed conflict.

For Significant Suppliers who identified high-risk smelters and suppliers, Wabtec Corporate sent such supplier a letter requesting: (a) that that supplier confirm whether these smelters are in fact in their supply chain, and if so, whether such materials are used in Wabtec products, (b) that the supplier encourage these smelters to participate in the RMAP, and (c) that if a smelter refuses to participate in the RMAP, such supplier should develop a plan to remove the smelter from its supply chain.

Step 4: Carry out independent 3rd-party audit of smelters/refiners’ due diligence practices

See Step 2.D above for a discussion of how Wabtec conducted its risk assessment at the upstream level by participating in and cooperating with industry organizations like RMI.

Step 5: Report annually on supply chain due diligence

We file this Report annually with the SEC, and a copy is publicly available on our website at: <https://ir.wabteccorp.com/2019-Conflict-Minerals-Report.pdf>.

3. Due Diligence Results

Wabtec relies on its suppliers to provide information on the origin of 3TG contained in the components and materials supplied to us. These suppliers are similarly reliant upon information provided by their suppliers. In 2019, Wabtec identified 4,593 Relevant Suppliers, including 1,056 Significant Suppliers. Our Significant Suppliers identified 279 smelters and refiners of 3TG that were potentially in their supply chains. Of these 279 unique facilities identified, 79% were validated as “conformant” under

the RMAP as of April 20, 2020. "Conformant" means that a smelter or refiner was audited by the RMI and has been found to be conformant with the RMAP. See [Table A](#) below for a list of these smelters and refiners and a summary of their validation status under the RMAP. Based on the information obtained as a result of the due diligence measures described above, we reasonably determined that the minerals processed by the smelters listed are from the countries listed in [Table B](#).

With regard to the specific smelters or refiners identified by Wabtec, we cannot be certain that the identified smelters and refiners supplied 3TG for parts and components supplied to Wabtec rather than to other customers. Wabtec does not purchase raw ore or unrefined tin, tantalum, tungsten or gold. Wabtec is many steps removed from the mining of the conflict minerals. For this reason, we have been unable to establish chain of custody or identify with confidence the specific facilities used to process the 3TG in our products and/or the country of origin, the mine or location of origin of the 3TG in our products.

4. Continuous improvement

Wabtec intends to continue its efforts in 2020 to improve its supply chain due diligence and further mitigate the risk that 3TG contained in its products supports armed conflict in Covered Countries by:

- Communication with suppliers to spread best practices learned during execution of the due diligence process in 2019 across the Wabtec business units and continue to improve the percentage of Significant Suppliers responding to Wabtec's supply chain surveys and the quality of their responses;
- Identification of and communication with smelters and refiners in Wabtec's supply chain, both directly and indirectly through Wabtec's Significant Suppliers, in order to increase the number of smelters and refiners that participate in the RMAP; and
- Coordination with any new Significant Suppliers to ensure that they understand Wabtec's responsible sourcing and compliance requirements, the requirements of the Conflict Minerals Rule, and the OECD Guidance.

Table A

(as of May 6, 2020)

Summary of Smelters and Refiners

of Smelters and Refiners Reported in Our Supply Chain

	Conformant	Active	On Smelter Look-up Tab List Only	Total
Tantalum	35	0	0	35
Tin	43	1	9	53
Tungsten	41	2	3	46
Gold	101	1	43	145
Total	220	4	55	279

We note the following in connection with the information contained in the foregoing table:

(1) While the smelters and refiners reflected in the table were identified by our Significant Suppliers as potentially being part of our 2019 supply chain, not all of the smelters and refiners may have processed the necessary 3TG contained in the in-scope products that we manufactured. Many Significant Suppliers reported to us at a "company level" the 3TG contained in all of their products, not just those in the products that they sold to us. Some Significant Suppliers also may have reported to us smelters and refiners that were not in our supply chain due to over-inclusiveness in the information received from their suppliers or for other reasons. In addition, the smelters and refiners reflected above may not be all of the smelters and refiners in our supply chain. Some Significant Suppliers may be unable to identify all of the smelters and refiners used to process the necessary 3TG content contained in the products that we manufactured, and not all of the Significant Suppliers responded to our inquiries.

(2) "Conformant" means that a smelter or refiner was audited by the RMI and has been found to be conformant with the RMAP.

(3) "Active" means that a smelter or refiner is a participant in the RMAP committed to undergoing an assessment and has scheduled an assessment date, or is participating in one of the cross-recognized certification programs.

(4) A smelter or refiner is listed as "On Smelter Look-up Tab List Only" if it was not Conformant or Active, but appears on the Smelter Look-up tab of the CMRT.

(5) The table excludes three smelters that ceased operations in 2019.

(6) The information reflected in the table is based solely on information made available by the RMI to its members, without independent verification by us.

Acronyms Used in This Report

3TG	Tin, Tantalum, Tungsten or Gold
CMRT	Conflict Minerals Reporting Template
DRC	Democratic Republic of the Congo
OECD	Organization for Economic Cooperation and Development
RMAP	Responsible Minerals Assurance Process (formerly the Conflict-Free Smelter Program)
RMI	Responsible Minerals Initiative (formerly the Conflict-Free Sourcing Initiative)
SEC	U.S. Securities and Exchange Commission

Forward-Looking Statements

This Report contains "forward-looking statements" – that is, statements based on our current expectations and projections about future events. These forward-looking statements are subject to various risks, uncertainties, and assumptions. For details on the uncertainties that may cause our actual future results to be materially different than those expressed in our forward-looking statements, see our annual reports on Form 10-K and quarterly reports on Form 10-Q. We undertake no obligation to update any statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events.
